Task Flow Scenarios & Personas

Task ID	Section	Scenario Description	HCI Goal
T1	Onboarding & Curation	The user sets regional tastes and a ₹1,500 budget; the system curates a 7-day balanced meal plan.	System-Initiated Personalization
T2	Delegated Sourcing	The mother taps "Notify Cook" to automatically send a Pesarattu ingredient list via WhatsApp.	Machine Handles Execution
T3	Symptom Triage	User reports "dizziness" via Voice FAB; AI analyzes recent logs and provides an Emergency Escape Hatch.	Closing the Gulf of Execution
T4	Meal Photo Audit	User takes a photo of Samosas; AI identifies the dish and updates nutrition progress bars instantly.	Satisficing (Heuristic #6)
T5	System Navigation	User navigates the central hub to evaluate daily iron/folate progress via visual bars.	Visibility of System Status

Usability Testing Participants

Participant ID	Role	Age	Tech Comfort (1–5)	Maternal Context
P1	Urban Working Mom	28	4	First-time pregnancy
P2	Rural Homemaker	32	1	Low-literacy segment
P3	Semi-Urban Domestic Help	26	2	Experienced mother
P4	Urban Stay-at-home Mom	34	3	Managing high-risk pregnancy
P5	Small Business Owner	30	3	Daily wage earner

Usability Testing Results: Comprehensive Matrix

Participant ID	Task ID	Success	Learnability (1-5)	Efficiency (1-5)	Errors	Observer Comments
P1	T1	Y	5	5	0	Extremely smooth; liked the budget slider.
P1	T2	Y	5	5	0	Understood the automation immediately.
P1	T3	Y	5	5	0	Voice interaction felt natural and quick.
P1	T4	Y	4	5	0	Found the AI photo identification impressive.
P1	T5	Y	5	5	0	Progress bars were clear and helpful.
P2	T1	Y	2	2	3	Needed help with budget; used voice prompts.

P2	T2	Y	4	3	1	Understood "Notify Cook" immediately.
P2	T3	Y	3	3	2	Voice FAB easy to find; hesitated at alert.
P2	T4	N	2	2	4	Struggled with camera focus and framing.
P2	T5	Y	3	2	1	Recognized the colors but missed text labels.
P3	T1	Y	3	3	1	Found regional dish icons very helpful.
P3	T2	Y	4	5	0	Seamless app-to-WhatsApp bridge.
P3	T3	Y	4	4	1	Liked the voice feedback from the AI.
P3	T4	Y	3	3	2	Photo was blurry; required second attempt.

P3	T5	Y	4	4	0	Easily identified Iron/Folate progress.
P4	T1	Y	4	4	0	Clear flow; liked the personalization.
P4	T2	Y	5	4	0	Fast execution; reduced household stress.
P4	T3	Y	5	4	1	Emergency button was very clear; felt safe.
P4	T4	Y	4	4	1	Successfully logged the afternoon snack.
P4	T5	Y	4	5	0	Progress bars provided clear feedback.
P5	T1	Y	3	3	1	Minor confusion on Regional Preferences.
P5	T2	Y	4	4	0	Effective; appreciated the pre-filled text.

P5	T3	Y	3	3	2	Voice FAB helpful during busy work hours.
P5	T4	Y	4	4	0	AI food identification was very fast.
P5	T5	N	2	2	1	Misinterpreted the gold/teal bar colors.

Sheet Tab 4: Key Insights & Actionable Recommendations

Category	Observation / Insight	Actionable Recommendation	Source
Navigation	Low-literacy users rely almost exclusively on the Voice FAB for complex inputs.	Implement voice-guidance for the Budget Slider to reduce errors.	User Testing
Automation	Automated dispatch to the cook was rated as the "most helpful" feature segment-wide.	Highlight "Automated" nature during onboarding to build value early.	IA Analysis
Feedback	Users felt rewarded when nutrition bars filled up in real-time on the dashboard.	Add celebratory haptic/sound feedback when a Folate goal is met.	Gulf of Evaluation
Safety	The "Emergency Escape Hatch" effectively bridged the gap to clinical care.	Ensure the "Call Doctor" button remains high-contrast (Orange/Gold).	IA Alert Logic
Recognition	AI photo identification (T4) significantly reduced cognitive tracking effort.	Expand the regional dish library to include more diverse Hyderabadi snacks.	Satisficing Logic
